INTRODUCTION

Welcome to the Department of Pathology and Molecular Medicine! This manual contains valuable information relating to your studies, from how to apply to the program, to what steps you will need to take to graduate. We hope that you will find this information helpful and that most of your questions can be answered here.

Good luck with your studies!

VISION

We strive to be national leaders in advanced diagnostic services, employee success, student achievement and knowledge discovery.

MISSION

Together, we proudly serve our regional community through the provision of expert laboratory and clinical services, education and research.

VALUES

In our pursuit of excellence, we value people by practicing mutual respect, professionalism, teamwork, integrity, trust and accountability.

DEPARTMENTAL HISTORY

1895 A new “unit” of Pathology and Bacteriology is established, and Dr. Walter T. Connell becomes its first full-time Professor and Chair and is also appointed as the first pathologist at Kingston General Hospital. He establishes what is probably the fourth clinical laboratory in North America.

1922 “The Pathological Unit” becomes officially “The Pathology Department” of Queen’s University and Kingston General Hospital and moves into its permanent home of the newly constructed Richardson Laboratory building, where it still resides.

1951 The modern era of pathology at Queen’s University begins with the appointment of Robert H. More to the Headship of the Department. During his fifteen-year tenure, More markedly expands the faculty, develops research programs which use the new technique of electron microscopy, initiates the Graduate Program and establishes the first four-year residency in General Pathology.

1962 Two floors are added to Richardson Laboratory, significantly increasing departmental research space.

1972 Dr. Nathan Kaufman, More’s successor, establishes a Cancer Research Group.

- 1979** Dr. David Robertson becomes Head and, through the early 1980's, nurtures the development of what are to become internationally recognized research programs in neuropathology, hemostasis and cancer biology. He also initiates an Outreach Program for the delivery of laboratory diagnostic and directorship services to remote sites.
- 1986** Dr. Robert Kisilevsky is appointed Head. He becomes an international leader in amyloidosis research and, during his five-year term, oversees significant growth in the Graduate Program and the introduction of pathology courses into the undergraduate Life Sciences program.
- 1991** Dr. Paul Manley becomes Head and leads the expansion of the Laboratory Outreach program to multiple sites across Southeastern Ontario. During his eleven-year tenure, cancer and molecular hemostasis research programs expand markedly.
- 2000** A Regional Forensic Pathology Unit is established.
- 2001** Diagnostic Laboratory Genetics and Clinical Genetics services are consolidated in a new Division of Genetics.
- 2002** Dr. Iain Young is appointed Head. He is responsible for growing graduate studies in the Department.
- 2003** The department changes its name to the "Department of Pathology and Molecular Medicine" to reflect its leadership role in the application of the understanding of disease at a molecular level to diagnostic services, clinical care, education and research.
- 2007** The Queen's Laboratory for Molecular Pathology is established.
- 2009** Dr. Victor Tron is appointed Head.
- 2014** Dr. Lois Shepherd is appointed interim Head following the departure of Victor Tron to St. Michael's Hospital in Toronto.
- 2016** Dr. Alexander (Sandy) Boag is appointed Head.

APPLICATION PROCESS

Applications are submitted online through the School of Graduate Studies' website at the following link: <https://eservices.queensu.ca/apps/sgsapp/>. In exceptional circumstances, paper applications are available upon request. Please email Mark Andrews at gradprogram@path.queensu.ca to request a paper application.

Deadlines

Applications are accepted year round. Start dates may be in September, January or May.

Finding a Supervisor

It will be necessary for you to personally contact researchers by regular mail, e-mail or fax in order to find a supervisor for your studies. It is recommended that you contact potential supervisors prior to submitting an application. Your application will be reviewed by the Pathology Graduate Studies Committee and the Department will not be able to commit to final acceptance of your application until you have found a suitable supervisor. The number of positions available to new graduate students is limited and not all research faculty will have space in their laboratories and/or funding for a graduate student at any one time. Faculty receive news of funding from granting agencies throughout the year. Also, students presently in labs defend their theses at different times, freeing up positions in different research areas.

The Graduate Program Assistant, Mark Andrews, maintains files on all graduate studies applicants to the Department of Pathology and Molecular Medicine and these are available to researchers should they be seeking a new graduate student at any time. Files remain valid for one year following the date of the application.

Before accepting a position in any laboratory, it is strongly suggested that you not only interview with your prospective supervisor, but also speak with graduate students in that laboratory as well as other students within the Department.

Once a supervisor has agreed to offer you a position and has contacted our Departmental office, you will be recommended for acceptance to the School of Graduate Studies and Research. A list of supervisory eligible faculty is available on our website at the following link:

http://clinlabs.path.queensu.ca/Education/Graduate_Faculty.php

FEES AND REGISTRATION

Tuition

For the most up-to-date information regarding current tuition rates and the cost of living in Kingston, please refer to the School of Graduate Studies website at the following link: <http://www.queensu.ca/sgs/current-students/registration-fees>

Net I.D.

Your NetID is your network identity at Queen's. It will be the "User ID" you need to sign on to the applications and services that are operated by ITSservices, such as email, Moodle course management system, SOLUS Student Center, MyQueensU Portal, QShare, Wiki, etc.

The login is called your "NetID", and instructions on how to generate them can be found at:

<http://www.queensu.ca/its/netid.html>

You will need your Queen's student number to go through these processes.

If you don't have your Student number, please call the School of Graduate Studies office at 613-533-6100. We cannot provide you with your student number by email, due to confidentiality requirements.

Registration

Registration is now completed online in SOLUS. Please refer to the following link for registration instructions for both new and returning students: <http://www.queensu.ca/registrar/Register.html>

HOUSING

Community Housing manages the student rental properties owned by Queen's University. This includes two apartment complexes located at west campus - An Clachan and John Orr Tower - as well as a variety of apartments and houses in the Student Village (Core Rentals) around campus.

Community Housing also operates an Accommodations Listing Service where external landlords can post listings for student rental units. The Landlord Contract Program is also managed by *Community Housing*.

Location:

Community Housing is located at 169 University Avenue at the corner of University and Clergy West. Paid parking is available underground at the Queen's Centre, entrance is off of Division Street.

Hours of Operation:

Telephone reception 8:30 am to 4:30 pm. Open to Walk-in Customers from 9:00 am to 4:00 pm, Monday to Friday (excluding holidays).

They are open over the lunch hour.

Phone: 613-533-2501 Fax: 613-533-2196 Email: community.housing@queensu.ca

Familiarize yourself with what graduate student support systems Queen's has to offer

For more information on University Supports: <http://www.queensu.ca/sgs/orientation/support.html>

FOR INTERNATIONAL STUDENTS

Medical Insurance: International students you & your dependents must sign up for UHIP **immediately** upon arrival, either in person at the Queen's University International Centre (QUIC), or online at <http://quic.queensu.ca/incoming/uhip-studentpre-registration.asp>

Work Authorization Permit & Student Visas: This applies only to international students who have visa status for their graduate studies. It is important that you register with the Immigration Office as soon as you arrive, in order to obtain clearance to work and study in Canada. The Office requires evidence that you have adequate financial support to cover your studying and living expenses.

Queen's University International Centre (QUIC): <http://quic.queensu.ca/> Phone: 613-533-2604

The Queen's University International Centre (QUIC) is a support service for all members of the Queen's community and through its activities promotes an internationally informed and cross-culturally sensitive learning environment.

They can help students with questions related to immigration or financial matters. You are invited to contact them or visit their comfortable setting on the first floor of the **John Deutsch University Centre** at the corner of Union Street and University Avenue. Office hours are 8:30 AM - 4:30 PM, Monday to Friday.

AROUND CAMPUS

School of Graduate Studies

Queen's graduate students are thought-provoking, engaging, with an insatiable thirst for learning and strong scholars and researchers.

The School of Graduate Studies has a number of resources and acts a gateway to others at Queen's for graduate students. These resources include:

- Providing information about how to register, find a place to live and more before arriving
- Linking you up with campus life and community services when you arrive
- Academic support workshops through the Expanding Horizons series, held throughout the year
- Assistance with awards and funding by administering the opportunities and ensuring graduate students receive payments in a timely fashion
- Assisting students and graduate programs with support for best practices in graduate supervision
- Providing policy guidance to students and graduate programs to change a students' status, explore student exchange opportunities and more
- Guiding students through the process of successfully completing their degree and graduating

Location:

Gordon Hall, Room 425
74 Union Street
Queen's University
Kingston, Ontario, Canada K7L 3N6
Phone: (1)-613-533-6100
E-mail: grad.studies@queensu.ca

Normal Hours of Operation:

Monday to Friday
8:30 AM – 12 Noon, 1 PM - 4:30 PM

Libraries

There are several libraries on campus which you can use.

Bracken Health Sciences Library (Main Floor of **Botterell Hall**, 18 Stuart Street).

For more information on all the libraries on campus see the library website at: <http://library.queensu.ca>

Campus Bookstore

A not-for-profit corporation that endeavors to distribute required course material at the lowest possible price to students, while operating a comprehensive University bookstore for the Queen's community. The Campus Bookstore is located in **Clark Hall** on Queen's University Main Campus. Open regular hours from 9 AM to 6 PM, Monday to Friday, and, 10 AM to 5 PM on Saturday. Open 24 hour-a-day at <http://www.campusbookstore.com>.

Campus Computer Sales & Service

The Campus Computer Store is now closed.

Services have now been moved to the following locations:

- **The Queen's Managed Mobile Plans**
The Queen's Managed Mobile Plans will remain a service of ITS and will operate as part of the [IT Support Centre](#) following the closure of the store. Visit the [Queen's Managed Mobile Plans](#) web page for detailed information on the available plans.
- **Departmental Orders**
If you are inquiring about purchasing IT equipment for your department, please visit the [Strategic Procurement Services Preferred IT Supplier webpage](#) and follow their [Getting Started Instructions](#) so you can purchase directly from their Preferred Suppliers list.
- **Personal IT Purchases**
For Personal IT purchases visit the [Employee Discounts page](#) of the Strategic Procurement Services website or the Campus Bookstore.
- **Computer Software**
Visit the [ITS Supported Software page](#) for more information on software and instructions on how to obtain it.

FUNDING

Stipends

Supervisors undertake to ensure that sufficient funds are available for his/her graduate student to perform a minimum of two years of bench research in the case of a Master's degree and a minimum of four years of bench research for a Doctoral degree. The minimum stipends, as of September 1, 2013, are:

	MSc	PhD
Stipend with no competitive award	\$21,700	\$22,700
Stipend with internal competitive award (+2.5%)	\$22,245	\$23,270
Stipend with provincial competitive award (+5%)	\$22,785	\$23,835
Stipend with national competitive award (+10%)	\$23,870	\$24,970

- The portion of your funding that comes from your supervisor's research grants will be paid at the end of each month. All awards are paid out at the beginning of each term (January, May, September) and will cover a 4 month period.
- Please check your contract carefully before signing off on it, to ensure that you are being paid correctly. If you have questions, please see the Graduate Program Assistant or your Departmental Financial Assistant.
- Supervisors may further supplement the above stipends.
- Under special circumstances, you may apply through the School of Graduate Studies for support to meet additional financial needs.
- Supervisors are not required to supplement external awards equal to or greater than \$25,000

Teaching Assistantships

There are a number of teaching assistant positions that may be offered to students throughout the year. Any money earned as a teaching assistant is not included as part of your stipend, and will be in addition to the minimum remuneration mentioned above.

Fellowship Opportunities

Full-time students, who are registered and in good academic standing with Queen's, are eligible for a wide range of internal and external scholarships and bursary awards. You are encouraged to apply to competitions for which you are eligible. For those competitions that require a departmental ranking, you and your supervisor are responsible for submitting all appropriate documentation necessary for assessment/ranking. If this information is missing, the committee will be unable to make an informed decision regarding your ranking status.

Notifications of bursaries/scholarships/fellowships competitions are e-mailed to all graduate students on an ongoing basis.

The following sites are also useful:

The **Queen's School of Graduate Studies Calendar**: <http://www.queensu.ca/calendars/sgsr/>

Terry Fox Foundation Training Program in Transdisciplinary Cancer Research in partnership with CIHR

Application deadlines are the beginning of November and June of each year. Exact dates are posted on the Cancer Research Institute site: http://qcri.queensu.ca/CIHR_Training_Program.html. The scholarship amounts vary depending on other awards held, but are typically \$12,500 per annum. The scholarship also comes with an annual \$2,000 travel award.

COS Funding Opportunities: <http://www.cos.com>

Ontario Graduate Scholarship (OGS): <http://www.osap.gov.on.ca>

Submit applications to Mark Andrews. Departmental deadline is February 1st.

Application instructions can be found in the following link:

<http://www.queensu.ca/sgs/forstudents/funding/ogs.html>

CIHR: <http://www.cihr-irsc.gc.ca/e/193.html>

NSERC: http://www.nserc-crsng.gc.ca/index_eng.asp

Heart & Stroke Foundation: <http://www.heartandstroke.com/>

Canadian Blood Services: <http://www.blood.ca/>

Canadian Breast Cancer Foundation: <http://www.cbcf.org/Pages/default.aspx>

Internal Scholarships/Awards/Fellowships

Queen's Graduate Awards

(Non-competitive)

\$ amount is variable, depending on Departmental allotment from School of Graduate Studies and any awards already held by student.

Graduate Entrance Tuition Award (GETA)

(For domestic students only - competitive)

The award is given to one new, incoming graduate student with an average of at least 80% (or equivalent) in each of the last two years of study.

Value is equivalent to one year's domestic tuition fee and is paid directly to the student's fees account.

McLaughlin, Bracken and other named Queen's Fellowships

(Competitive)

No application required. Departmental ranking of students is submitted to the School of Graduate Studies.

Eligibility: Must have applied for at least one external award for which student is qualified; be registered full time; and have attained an over 80% average in each of last two years.

(~\$10,000) - Deadline in March of each year.

Thesis Completion Funding

Eligibility: PhD student in 5th year. Provides financial assistance to PhD students who are in the final stages of writing their thesis. Apply in Spring. Availability of award is on a first-come first-serve basis.

The Robert Kisilevsky Fund for Research Education

(Non-competitive)

This endowed fund supports a bursary program for full-time PhD students in the first year of their program in the Department of Pathology and Molecular Medicine. The bursaries are one-time awards, paid in September, which are provided in addition to any other support received by students from either their supervisors or other sources. The bursary is not a competitive award and all PhD students will receive one during their first year of full-time studies. Students joining collaborative programs are eligible to receive the award once they have identified Pathology and Molecular Medicine as their home department.

\$ amount is variable.

The Jeremy Nesheim Graduate Travel Award

(Competitive)

The purpose of this Fund is to enhance graduate student support within the Department of Pathology and Molecular Medicine. The fund will support graduate travel and expenses to an expert laboratory relevant to the student's field of study and recommended by the student's supervisor. Preferably this should provide the student with experience outside Canada. The fund is not intended to support bursaries or fellowships. Applications are due the 2nd week of October. Information available from the Graduate Program Assistant.

Funding for Attendance at Scientific Meetings

You are encouraged to submit papers, presentations, and/or posters to appropriate scientific meetings. Only those students attending meetings to present graduate research performed in the Pathology Department at Queen's will have access to funding to defray costs of travel, etc. Please retain all expense receipts including boarding passes.

1. The Department will provide on a first-come-first-serve basis \$300/academic year for this purpose. A Conference Travel Application should be completed as early as possible and must be submitted to the Graduate Program Assistant prior to attendance at the meeting. A Conference Travel Claim Form should be completed upon return from the conference and submitted to the Graduate Program Assistant.
2. The Department will provide 50% of the remaining costs, to a maximum of \$500. On return from the Conference, a Travel Expense Report should be completed online and e-mailed to the Graduate Program Assistant with the original supporting receipts (including any boarding passes).

Students who have left the Department by the time the Conference takes place are eligible for travel funds, providing the abstract was submitted while they were enrolled as a full-time graduate student in the Pathology Department at Queen's University.

COURSES AND RELATED INFORMATION

Registration

Registration is currently completed online in SOLUS. Certain courses required instructor permission or have prerequisites, and will be designated as such in SOLUS. To make changes to course registrations or to add a course after the start of the semester, an Academic Change Form is presently required. This form can be found at the following link: www.queensu.ca/registrar/aboutus/forms/SGS_Academic_Change_Form.pdf

Degree Requirements

Courses are chosen in consultation with your supervisor. Courses that are counted toward satisfying your Program requirements are designated as "Primary Courses". Graduate courses acceptable to the Department must be of a high calibre and suitably directed towards the level of training required for the program in which you are registered. Graduate credit will not be awarded for dual numbered courses taken as undergraduates.

A student entering the Master's or Doctoral Program with an Honours degree from a Canadian University is required to take a minimum of four half courses at the 800 level taken over a period of two years.

1. Pathology 827 - Research Project in Pathology*
2. Pathology 830/930 - Departmental Research Seminar Series*
3. To be chosen by the student and supervisor
4. To be chosen by the student and supervisor

A student entering the Doctoral Program in the Department with a Master's degree from another department or institution is required to take a minimum of two half courses at the 800 level.

1. Pathology 830/930 - Departmental Research Seminar Series
2. To be chosen by the student and supervisor

PhD candidates must also complete a comprehensive examination (see Comprehensive Examinations).

*Pathology 827 and Pathology 830/930 begin in the first term of registration in the program. However, students should not register on SOLUS until the beginning of the semester in which the course will be completed – the second semester for Pathology 827; the fifth semester for Pathology 830; and normally the seventh semester of Pathology 930.

Path 827 - Research Project in Pathology

(Course coordinator – Peter Greer <greerp@queensu.ca>)

This course is taken by all MSc students or those directly entering into the PhD program. Exceptions may be made with permission of the Graduate Program Committee. The course will normally be completed in the second term; and course registration will normally be in January, at the start of the second term. In exceptional circumstances, where English proficiency or academic background might be an issue (such as the need to take remedial course work), it may be extended beyond two terms. The student and supervisor will first establish a supervisory committee consisting of the supervisor and two other faculty members; neither of which need hold primary Pathology appointments. The supervisory committee members and the course coordinator will evaluate the required course work. The course coordinator (Peter Greer) and Graduate Program Assistant (Mark Andrews) must be officially informed of the composition of the supervisory committee by the student by the beginning of the 4th week of study.

The first part of the course will involve three essays, each based upon a key research paper (not a review article) provided to the student by the supervisor. These research papers should highlight central themes related to the research program of the students thesis work. Supervisors are requested to provide each of these three papers six weeks prior to the respective essay due date. The student will evaluate each research paper, read the related literature and write a concise summary essay for each of these research papers using the format of a News and Views article in Nature. This should consist of a concise summary paragraph, followed an overview of the field, a brief description and critical assessment of the work, and a discussion of its relevance/significance to the field and what it means in terms of future directions. Ideally, a concise original figure capturing the key points of the work should be included. The essay will be a maximum of 5 double spaced pages (Times Roman, 12 font, 1 inch margins all around; not including figures and references). Be sure to properly cite the primary literature using the format of Cancer Research or a comparable format which includes titles in the cited literature.

On the due dates for these three essays, the student will provide hard copies of the essays and associated research papers to their supervisor and supervisory committee members; and they will email an electronic file copy of the essay (in Word, not PDF; figures may be sent as a PDF) and PDF files of the research article to the course coordinator. Late assignments will be penalized. The coordinator will email each member of the supervisory committee a "Path 827 essay evaluation form". Committee members will send their completed evaluations to the coordinator, who will tabulate the marks and send the feedback and averaged mark to the student. In addition to carefully considering feedback provided in these evaluations, the student should discuss their essays with their supervisor and supervisory committee members to solicit feedback to assist in refining their writing skills in subsequent assignments. The objective of these essays includes developing skills in scientific writing and critical evaluation of published research papers, as well as beginning to build a bibliography of relevant literature to draw on in future writing commitments (e.g. research proposal, mini-master, comprehensive, manuscripts and thesis).

The second component of the course is a written research proposal and oral presentation. The ideas for this proposal will be developed in consultation with the supervisor. Students may solicit verbal feedback from their supervisors on drafts of this proposal, but supervisors should not edit these drafts. In the case of students intending to graduate with an MSc degree, it is encouraged that this proposal be developed in such a way that it will form the foundation of the students' eventual thesis research. However, for direct entry PhD students, or those intending to convert to the PhD stream, it is understood that this proposal might be largely an exercise, and may or may not closely conform to their eventual PhD thesis research project. The written research proposal is due in March; normally 6 weeks after the last essay. It is to be written in the form of a grant proposal and will contain the following sections: 1) Summary with hypothesis and bullet point aims; 2) Background, concluding with restated hypothesis and experimental aims; 3) Detailed experimental aims and approaches, including preliminary data and discussion of expected outcomes and potential caveats; and 4) Significance and future perspectives. The maximum length of this document will be 10 double spaced pages (Times Roman, 12 font, 1 inch margins all around; not including figures and references). An oral presentation of this proposal will take place in late March. The student will give a 20 minute oral presentation structured in the format intended for their Department seminar. The presentation will be followed by a question and discussion period of approximately one hour.

Students will be evaluated on their three essays (20% each), the written research proposal (20%) and on their research proposal presentation/discussion (20%).

Path 830/930 - Departmental Research Seminar Series

The requirements for this course will be satisfied by (1) regular attendance, and (2) scheduled presentations of your work, at the weekly seminar series (Tuesdays at 4:00 PM).

Path 830 - Master's students will give ½ hour seminars in their first year and one hour (approximately) seminars in the second year. Registration will take place at the beginning of the fifth semester, in which the course will be completed.

Path 930 - Direct entry PhD students, and those in the PhD program after completing a Master's degree, will give one hour seminars in their first and third years. Registration will normally take place at the beginning of the seventh semester, in which the course will be completed. Students transferring to the PhD Program via the Mini-MSc route will give their first PhD seminar in the 2nd year of their PhD Program. PhD students will be offered a chance to give an exit seminar in their final year.

Only one mark will be assigned, based on the average of the first two seminars. If a grade has been submitted for Path 830, a second grading for Path 930 is unnecessary.

Online Courses

QACS 799

All students with proposed thesis work involving the use of experimental animals must take “Introduction to Animal Care” at the first available opportunity (the course is available online at the beginning of each term - offered by Animal Care Services). This is in addition to the course requirements given above. Although it is a non-credit course, it must be entered on the student registration form to receive recognition. Students should advise the Graduate Program Assistant if they are not required to take the course, i.e. their work will not involve experimental animals.

SGS 804

A non-credit online tutorial in Human Research Participant Protection (CHRPP) (<http://www.chrpp.ca/homepage/QUEENS>) is required by the School of Graduate Studies, and will provide a certificate confirming completion.

PHYG 801, SGS 801, MICR 809/909

Although very useful courses, and suggested for all graduate students, these courses cannot be used as credit courses toward either an MSc or PhD degree.

Academic Dishonesty

Academic dishonesty, including plagiarism and falsification of data, is considered an extremely serious offence by this Department and the University.

The School of Graduate Studies document on academic dishonesty (<http://www.queensu.ca/sgs/forstudents/policiesprocedures/FINALSGSAcademicIntegritypolicyMay2010.pdf>) should be read carefully to familiarize yourself with its contents and implications.

Course Failure

In primary courses, a minimum of second class standing (65%) must be attained. In cases where a minimum of 65% is not achieved, your supervisory committee may recommend to the Graduate Coordinator that you:

- (a) repeat the examination within one year after original examination, or
- (b) repeat the course, or
- (c) take a substitute

If such a recommendation is not made, you may be asked to withdraw from the program.

Changes in Registration, Status and Course Work

Changes in status of program of study (e.g. part-time on-campus versus off-campus), and course deletions and additions are recorded on an Academic Change Form, initialed by the Course Coordinator; signed by the Supervisor and Department Head; and submitted to the School of Graduate Studies for approval.

***Change of addresses cannot be accepted from via e-mail. Legally, a signature is required. Please fax or mail changes of address to the Grad School or bring to the Department.

GRADUATE STUDENT SUPERVISION

Supervisors

It is understood that the primary supervisory role rests upon your supervisor, and that your supervisor has the responsibility of overseeing your day to day progress, of directing research and of advising on a variety of academic matters.

Co-Supervisors

Sometimes it is useful for to have two co-supervisors; for example, when the thesis topic spans two disparate fields, the particular expertise of each co-supervisor would be helpful. In such cases, one of the co-supervisors must be designated as the major supervisor (indicate this on the financial and supervisory statement) and will take primary responsibility for your academic supervision, especially in dealings with the graduate office. Students with co-supervisors should discuss the details of collaborative research with each of their supervisors. In cases of co-supervision, it may be appropriate to have an additional member on the supervisory committee. This decision should be made in consultation with the Graduate Program Director.

Supervisor's Absence

If a graduate supervisor leaves the University, or is absent on sabbatical leave, or is required by the University to perform other duties that would impair effective supervision, the supervisor must make formal written arrangements for an interim supervisor to act as both an academic and research advisor. Copies of this written arrangement must be given to both to you, as the student, and the Graduate Program Assistant to be put in your student file.

Change of Supervisor

The initial selection of a supervisor is usually considered a permanent arrangement. If, however, you and your supervisor do not work well together, or find that your research interests are not compatible, a request to change supervisors may be made in writing to the Graduate Program Committee. In all cases, it is recommended that you discuss the proposed changes with all members of your supervisory committee and with the Graduate Program Director before a formal request for change is made.

SUPERVISORY COMMITTEES

Each student will have a supervisory committee. Under ordinary circumstances, the members of the supervisory committee act as supplementary (or complementary) advisors, and monitor your academic progress. In exceptional circumstances, the committee will act as a first "adjudicating" body in settling a disagreement between you and your supervisor. The membership of supervisory committees (for students new to their program) will be reviewed and approved by the Graduate Program Committee.

Formation

Supervisory committees must be formed within the first term of graduate study and are chosen by the supervisor in consultation with you. The members of the supervisory committee must be listed on your Financial and Supervisory Statement each year. The Graduate Program Committee may recommend changes if the committee structure is unsatisfactory (see below).

Composition

For an MSc student, the supervisory committee consists of the supervisor and at least two other members. Supervisory committee members may be from a different research group either inside or outside the Department.

For a PhD student, the supervisory committee consists of the supervisor, and at least two other members. Supervisory committee members may be from a different research group either inside or outside the Department. In some circumstances, students may have a committee member from outside Queen's. In such cases, a request must be made in writing to the Graduate Program Committee, stating reasons for the request and qualifications of the proposed committee member.

Supervisory Committee Meetings

The first meeting with your supervisory committee will normally take place in conjunction with the Path 827 research proposal presentation. However, you are encouraged to meet with members of your committee prior to this to discuss your Path 827 writing assignments.

Scheduling Supervisory Committee Meetings

Supervisory committee meetings documenting progress in the program must take place annually. It is the responsibility of you and your supervisor, to schedule these meetings; ideally, they should occur concurrently with each programmatic milestone. The first will take place concurrently with presentation of the Path 827 Research Proposal. Others will precede requests to advance into the PhD program by way of a Mini-Masters, preparation for the PhD comprehensive exam, requests to proceed to writing MSc or PhD theses, and following departmental seminar presentations. In advance of these meetings, you must prepare a written summary of research progress and future plans using the Annual Progress Report form (see below). This is to be distributed to the supervisory committee members at least five working days prior to these meetings. Upon the conclusion of the meeting, a signed copy of this report will be submitted to the Graduate Program Assistant for your student file. You or your supervisors may also call a supervisory

committee meeting any time to address academic problems or difficulties with your research program. The Committee must at least once a year.

Your Presentation to Your Committee

Your committee meeting will typically begin with a short presentation (20 minutes max.). This presentation should briefly re-introduce your project to the Committee, give the hypothesis and experimental goals, the experimental progress to date and the future plans and milestones. The Committee will then ask questions and give you feedback and make suggestions. Normally these meetings run approximately 90 minutes. The Committee must meet at least once a year.

Annual Progress Reports

An Annual Progress Report form must be filed with the Departmental Graduate Program Assistant after each committee meeting, summarizing your academic and research progress and plans for the future. This form is available on the departmental web site.

http://www.path.queensu.ca/Education/Graduate_Studies_Forms.php

Your student file will be checked for these Reports (1) prior to allotting Queen's Graduate Awards and (2) prior to a defence. If no recent supervisory committee documentation is present, you will not be eligible to receive a Queen's Graduate Award. Defence committee members will also not be approved unless such documentation exists.

On each report, your progress to date must be indicated as "Satisfactory", "Conditional" or "Unsatisfactory".

"Satisfactory" indicates that the student has received a passing grade on graduate courses and that the thesis research is progressing well and on schedule.

"Conditional" indicates that, due to course failure or lack of research progress, the student is not performing at a level that would allow the planned program to be completed successfully within the expected period. In such cases, another committee meeting must be held within four months to further evaluate the student's progress and to assess any conditions imposed at the previous meeting. In some cases this follow up meeting might have to be delayed for up to eight months if a course has to be taken. At this second meeting the student's progress must be deemed "Satisfactory" or a further meeting must be held within two months to further evaluate the students' progress. At this time only a "Satisfactory" or "Unsatisfactory" rating can be given. Student's receiving a second consecutive "Unsatisfactory" rating will be asked to withdraw from the program

An "Unsatisfactory" rating indicates that the student is not performing at the expected level. Within two months, the student must have another Committee meeting to determine his/her continuation in the program. At this time, a student receiving a second "Unsatisfactory" rating will be asked to withdraw from the program.

All "Conditional" and "Unsatisfactory" ratings from committee meetings will be brought to the attention of the Graduate Program Committee which may recommend further courses of action to the student and/or supervisory committee. A copy of this report will also be made available to you.

PhD COMPREHENSIVE EXAMINATIONS

Aims

The purpose of the PhD Comprehensive exam is to test your knowledge of your research area. This knowledge should range from an in-depth comprehension of the specific details of your proposed PhD project to a general knowledge of the wider research area. This general knowledge base should enable you to comprehend and discuss the broader implications of your research.

Timing

Students entering the PhD program directly from a BSc program or after completing an MSc degree will take the PhD comprehensive within 24 months of entering the PhD program. Those entering the PhD after completing a Mini-Masters will normally take the PhD comprehensive within 12 months of entering the PhD program.

Procedure

The PhD comprehensive exam will be based upon a written document entitled "PhD Comprehensive: Written Report" (see below) that is based upon the student's PhD thesis project. A twenty minute presentation of this proposal will be followed by an oral examination of approximately 90 minutes.

Timeline

Six weeks prior to the student and supervisor will provide the Graduate Program Assistant with a proposed date of the defence, the names of three suggested external examiners, and the comprehensive proposal topic/title for approval by the Graduate Program Committee. Once the defence committee is approved, the Graduate Program Assistant will arrange a specific date/time for the oral examination and confirm the details with everyone involved.

At least two weeks prior to the defence date the written proposal must be circulated to all members of the Comprehensive Examining Committee. Each member will advise the Graduate Program Assistant at least three days prior to the oral examination whether the written proposal is a "Pass" or "Fail". You will be informed whether the oral examination should proceed based on the written component of the proposal.

Composition of the Committee

The Committee will be comprised of the Supervisory Committee, one external examiner (from outside the Department of Pathology and Molecular Medicine but within Health Sciences). A faculty member of the Graduate Program Committee will act as the Chair.

Evaluation Process

Written Component

The Graduate Program Assistant will provide each examiner with an "Evaluation of the PhD Comprehensive: Written Report" form. Any concerns regarding the written component of the PhD Comprehensive must be reported by examiners to the Graduate Program Assistant at least three working days prior to the oral examination date. If two or more examiners independently give a 'fail' decision to the written component, the oral exam will not take place. If there is no response from a Committee member, it is assumed that decision is a "pass". The Graduate Program Director will inform the candidate that the exam is postponed and a resubmission of the proposal will be requested.

Oral Examination

The Chair (Graduate Program Director or delegate) is provided with a document outlining the procedures for conducting a PhD Comprehensive examination. The role of the Chair is that of an impartial observer who will ensure that the examination proceeds fairly. The Chair may pose a few relevant questions but is not part of the evaluating group.

The oral exam will consist of a 20 minute presentation, followed by two rounds of questions totaling a maximum of 90 minutes. Normally this will consist of a first round of questions lasting up to a maximum of 20 minutes per examiner, followed by a second round lasting up to a maximum of 10 minutes per examiner.

At the end of the examination, you will be asked to leave the room while the Examining Committee members discuss your performance. The examining committee will decide to assign a pass or fail grade. Two or more negative votes by the examining committee will result in failure of the PhD Comprehensive examination. The decision of the examining committee shall be forwarded to the School of Graduate Studies and Research.

In the event of a tied vote, committee members are asked to provide a percentage mark for each component of the examination. In these circumstances, an average mark of greater than 70% for each component of the exam is deemed as a passing grade.

Format of the Written Report

- The written report should outline the background of the thesis project, the work done to date, and the proposals for development of the research into a doctoral thesis.
- The format of the PhD comprehensive should be as follows: Title Page; Abstract (approximately 250 words); Introduction and background literature relevant to the thesis; Experimental Progress by the applicant to date; Hypothesis and Specific Objectives; Proposed Research / Detailed Experimental Plan; Discussion; Figures & Legends; References must include titles and full literature citations.
- The length of the document should be 20 double-spaced pages excluding Figures, Tables and References. It should be in Times New Roman font 12 and have 1 inch margins all around.
- The PhD comprehensive document should be complete in itself. However, publications, submitted or draft manuscripts may be appended.
- While manuscripts submitted for publication may be appended, the completion of sufficient work for such a publication is not a prerequisite.
- You must indicate in the report where/when significant work related to the progress was done by others.
- You should not need to be absent from laboratory work for the purpose of writing the PhD comprehensive for longer than two weeks.

Nature of Study Areas and Content of Questions

An issue that causes PhD candidates frequent concern is the scope of questions that they might expect to be asked during the oral defence of their written comprehensive proposal. While there is no simple answer to this question, questions will relate to the theoretic or practical content of the proposal or will concern matters that are deemed to be related and pertinent to the main topic of the proposal, as outlined in the introduction of your written document. Candidates are encouraged to approach individual members of their comprehensive examination committee in the two weeks prior to their oral defence to enquire into specific areas that the committee members may feel especially worthy of questions. This advice may, in some instances, take the form of a reading list of subject areas or pertinent references.

Each member of the Examination Committee is required to submit to the Department a brief written evaluation of your performance following the examination. These comments are available to you.

You may appeal decisions made by the Comprehensive Examining Committee through the normal protocols outlined in the Queen's University School of Graduate Studies and Research Calendar (Section 8.9 Review of Academic Decisions).

To monitor and assess the fairness of the comprehensive process, the School of Graduate Studies requires two forms to be completed.

Form A: PhD Comprehensive Examination

This form is to be completed and signed by you and the Coordinator. The form attests that you have been provided with the appropriate information concerning the Department's procedures, timing of the examination and the criteria used to judge the outcome of the exam. The original is to be retained by the Department. A copy will be submitted to the School of Graduate Studies. If the comprehensive examination is held in two parts, the form needs only to be submitted prior to the first part.

Form B: PhD Comprehensive Examination Confidential Report

This report allows each participant (chairperson, candidate, examiner & supervisor) an opportunity to comment on the conduct of the examination in light of the approved procedures. All originals are to be submitted directly to the Dean, School of Graduate Studies, by each participant of the examination committee as well as the candidate immediately following the comprehensive or qualifying exam.

On Completion of the PhD Comprehensive Exam

- The Chair will inform you of the results of the Comprehensive examination immediately following the completion of the oral defence.
- The Chair's copy of the comprehensive proposal and any required documentation are to be returned to the Graduate Program Assistant or Coordinator.
- A letter will be sent from the Department to the School of Graduate Studies and Research detailing the date and outcome of the Comprehensive Examination.
- Copies of the written comprehensive proposals and written documentation of the outcome of the examinations are to be filed with your student records.

Failure of the PhD Comprehensive Exam

Failure at the first attempt of the written proposal will require review and resubmission of the proposal within one month. Failure at the first attempt at the oral comprehensive examination may be followed by a re-examination within three months. Normally, failure at the re-examination results in a recommendation to the School of Graduate Studies that you withdraw from the Graduate Studies Program.

MINI-MASTER'S THESIS

Criteria

Acceleration into a PhD program without completing the Master's thesis is reserved for students who meet the following criteria:

- have completed at least one term, full time, and have completed at least two graduate courses or equivalent
- have made the request following one term of enrolment (4 months) and prior to the end of the 5th term of study (20 month).
- have an undergraduate honours degree with a minimum upper second class standing or equivalent.
- have had an overall first class average (A) in graduate courses completed. A student need not have completed all course requirements before applying for Mini-Master's but must satisfy them prior to completion of their graduate degree
- have demonstrated the ability to perform original research.
- have shown the ability to prepare research results in written form, poster form, or for oral presentation.
- failure to complete the Mini-Master's requirements within the 24-month time limit will preclude enrolment as a PhD student until such time as the deficiencies have been cleared.

Procedure

Between the 3rd to 5th terms of study:

You and your supervisory committee meet to approve the request to transfer into the PhD Program via the Mini-Master's thesis route. This meeting and approval of the supervisory committee must be documented with an Annual Progress Report form. The supervisor writes a letter to the Graduate Program Director indicating (a) your request; (b) a brief justification outlining your qualifications; and, (c) a sentence indicating the Supervisory Committee's knowledge and support of the request.

The documents outlined in points 1 to 4 below are forwarded to the Graduate Program Assistant for submission to the School of Graduate Studies. No application fee is required

1. Letter of support from the supervisor (as above)
2. Outline of current and proposed research
3. Completed paper application for the PhD degree program
4. Two letters of reference from the application package
5. Transcript (unofficial)

No later than 40 working days after the approval to proceed via the Mini-Master's route has been confirmed in writing by the School of Graduate Studies, you will defend a written research report and proposal in an oral examination to an Examining Committee.

Composition of the Committee

The Committee will be comprised of one external examiner (from outside the Department of Pathology and Molecular Medicine but within Health Sciences) and two examiners from the department and the supervisor. Normally, members of the examining committee will not be from the supervisory committee. A faculty member of the Graduate Program Committee will act as the Chair.

Approximately six to eight weeks prior to defence

- You and your supervisor must agree upon a list of suitable examiners (their specific areas of expertise should be pertinent to the content of the proposal), as well as a suitable time frame. This information as well as the topic of the Mini-Master's thesis is to be submitted to the Graduate Program Assistant.
- Once the Departmental Graduate Studies Committee approves the list of examiners, the Graduate Program Assistant arranges a specific date and time for the examination that is mutually convenient for the participants.
- You should ensure that the necessary audio/visual equipment is available

At least 10 working days prior to the defence:

- You must submit your Mini-Master's thesis to each member of your examining committee (along with the necessary administrative forms provided by the Graduate Program Assistant).

The Graduate Program Assistant will send a PASS/FAIL form to the Chair which will be signed by the committee members on completion of the defence. This is to be returned to the Assistant for submission to the Chairperson of Division I.

Preparation of the Written Report

- The written report (Mini-Master's thesis) should outline the background of the thesis project, the work done to date, and the proposals for development of the research into a doctoral thesis.
- The format of the mini-thesis should be as follows: Title Page; Abstract (approx. 250 words); Introduction and background literature relevant to the thesis; Experimental Progress by the applicant to date; Hypothesis and Specific Objectives; Proposed Research / Detailed Experimental Plan; Figures & Legends; References must include titles and full literature citations.
- The length of the Mini-Master's thesis should be 20 double-spaced pages, excluding Figures, Tables and References. It should be in Times New Roman font 12 and have 1 inch margins all around.
- The Mini-Master's thesis should be complete in itself. However, material such as publications submitted or draft manuscripts should be appended.
- While manuscripts submitted for publication may be appended to the Mini-Master's thesis, the completion of sufficient work for such a publication is not a prerequisite for submission of a Mini-Master's thesis. The timetable for the Mini-Master's thesis decision is such that many students may have had time to display exceptional initiative and competence in the laboratory, but not necessarily to have accumulated sufficient results for a publication.

- You must indicate in the Mini-Master's thesis where/when significant work related to the progress was done by others.
- You should not need to be absent from laboratory work for the purpose of writing the Mini-Master's thesis for longer than two weeks.
- Examples of Mini-Master's theses written by successful candidates are available upon request from the Graduate Program Assistant to assist as a template for the content and format of the document.

Evaluation Process

Written Component

The Graduate Program Assistant will provide each examiner with an "Evaluation of the Written Report" form. Any concerns regarding the written component of the Mini-Master's thesis must be reported by examiners to the Graduate Program Assistant at least five working days prior to the oral examination date. If two or more examiners independently give a 'fail' decision to the written component, the oral exam does not take place. The Graduate Program Director will inform the candidate that the exam is postponed and a resubmission of the proposal will be requested.

Oral Examination

Chairs (Graduate Program Director or delegate) are provided with a document outlining the procedures for conducting an examination. The role of the Chair is that of an impartial observer who will ensure that the examination proceeds fairly. The Chair may pose a few relevant questions but is not part of the evaluating group. The exam will begin with a presentation of your research proposal that may not exceed 20 minutes. This will be followed by a round of questions lasting a maximum of 20 minutes per examiner. The supervisor may also be invited to ask up a couple of questions but will be limited to 5 minutes. Questions will primarily relate to the background of the project, hypothesis and specific experimental aims, research progress, technical aspects of the proposed experiments, and the theoretical basis for expanding the project to a PhD. The question period for the Mini-Masters oral exam should normally proceed no longer than 90 minutes. You are expected to provide evidence of familiarity with the pertinent background and techniques, show a good understanding of the project, the results to date and the future research proposal, and provide evidence that the project offers promising lines for extension.

At the end of the examination, you will be asked to leave the room while the examining committee members discuss your performance. The examining committee will decide if you will be recommended for direct advancement to the PhD program or not. Two or more negative votes by the examining committee will result in failure of the Mini-Master's examination. The decision of the examining committee shall be forwarded to the School of Graduate Studies and Research.

Those who pass their Mini-Master's examination will be allowed to transfer to the doctoral program. Students who do not pass the Mini-Master's examination will be allowed to complete the MSc thesis, according to School of Graduate Studies regulations.

THESIS DEFENCE EXAMINING COMMITTEES

Thesis defence examining committees will not normally include supervisory committee members. Other members whose expertise is appropriate should be given preference. To aid the Graduate Program Committee in choosing appropriate examiners, the names of the supervisory committee members will need to be provided at the same time as the suggested defence committee members.

Please note: For examiners to be chosen from another Department, preference will be given to faculty who are NOT cross-appointed to the Department of Pathology and Molecular Medicine. If only cross-appointees are suggested as external examiners, the Graduate Studies Committee may choose to recommend different examiners.

Mini-Master's Defence Committee Structure

The Mini-Master's Committee will normally be comprised of:

- Chairperson (a faculty member of the Graduate Program Committee. Ensures that the conduct of the examination is fair and that the questions posed to the candidate are appropriate)
- Internal/External Examiner (a faculty member whose primary appointment is outside of Pathology and Molecular Medicine but within the Faculty of Health Sciences)
- 2 Internal Examiners (Departmental faculty members, with preference being given to those with a prime appointment is in Pathology and Molecular Medicine)

The three examiners will be chosen, if possible, from a list of examiners provided by the student/supervisor.

The supervisor is encouraged to be present and may ask questions but is not considered as an examiner.

MSc Thesis Defence Committee Structure

- Chairperson (this individual is chosen by the Graduate Program Assistant)
- Delegate of the Head of the Department
- Supervisor and/or co-supervisor
- Internal Examiner (Departmental faculty member)
- Internal/External Examiner (a faculty member whose primary appointment is outside of Pathology and Molecular Medicine but within the Faculty of Health Sciences)

An external examiner is not required but may replace the Departmental member following the advice of the supervisor and approval by the Departmental Graduate Program Committee. In such cases, the supervisor takes responsibility for arranging reimbursement of the expenses of the external examiner.

The three examiners will be chosen, if possible, from a list of examiners provided by the student/supervisor.

PhD Thesis Defence Committee Structure

- Chairperson (this individual is chosen by the Thesis Coordinator, Rose Silva, in the School of Graduate Studies)
- Delegate of the Head of the Department
- Supervisor and/or co-supervisor
- Internal Examiner (Departmental faculty member)
- Internal/External Examiner (a faculty member whose primary appointment is outside of Pathology and Molecular Medicine but within the Faculty of Health Sciences)

External Examiner (from outside Queen's University. External Examiners may now choose not to be in physical attendance for the oral examination, and to conduct their questions through Skype, videoconferencing or teleconferencing)

THESIS FORMAT (Research streams)

Once the student and supervisor have agreed that the majority of the experimental work is complete, a committee meeting should be scheduled where the student provides the Supervisory Committee members with an outline of the proposed thesis including the selected format. At this time committee members will determine if the research is of sufficient quality to begin writing of the thesis.

It is recommended that students review these guidelines with their supervisor in order to choose the best format for their work. The supervisor should be kept updated on thesis writing progress and the supervisor must be given ample time to review the entire thesis BEFORE submission to SGS in preparation for the oral defence.

PLEASE NOTE: PhD theses must not exceed **175** pages and MSc theses must not exceed 100 pages (not including appendices and references), unless specific approval by the **departmental GPC** is granted.

Thesis Format

The SGS allows theses to be formatted in either Traditional or Manuscript format. Note: The School of Graduate Studies (SGS) sets minimum submission and formatting standards for all theses submitted and these standards cannot be set aside (including margins, font size and line spacing). Please consult the SGS website <http://queensu.ca/sgs/current-students/degree-completion> for these mandatory details.

Layout for TRADITIONAL form of thesis:

Title Page

Abstract (not more than 350 words)

Statement of Co-Authorship (if necessary)

Acknowledgments

Table of Contents (including bibliography, appendices, etc.)

List of Tables

List of Figures and Illustrations

List of Abbreviations

Chapt. 1: Introduction – brief summary of the research problem (not more than 3 pages)

Chapt. 2: Literature Review (**normally** no more than 25 pages for MSc and 40 pages for PhD)

Chapt. 3 to 5: Body of Thesis (Materials and Methods; Results; Discussion)
Chapt. 6: Summary (including Future Directions)
Bibliography or References
Appendices

The formal section, "Statement of Co-Authorship", should delineate the candidate's contribution to the knowledge within the thesis, and should allow the contribution of co-authors (if any) to be discerned.

MANUSCRIPT form of thesis:

The manuscripts included need not be published or accepted for publication at the time of the thesis defence, but this format is generally intended for use when 2 or more manuscripts acceptable to the field with the student as first author/co-first author have been generated prior to the thesis defence. Publication or acceptance for publication of research results before presentation of the thesis in no way supersedes the University's judgment of the work at a thesis defence. Results that the student wishes to include in the thesis that do not fit within a particular manuscript may be included in an appendix. In this format, references used within each chapter will be cited at the end of that chapter.

If the Manuscript format is chosen the following criteria must be met in addition to those designated by the SGS:

- this format is only acceptable for theses with 2 or more manuscripts
- a preprint formatted version of the manuscript must be used rather than reprint so that the formatting throughout the thesis is consistent
- majority of the manuscripts must have the PhD candidate as either first or co-first author
- inserted reprints will not be accepted
- students who have collaborated on a manuscript may each include it in their own thesis.
- chapters composed with multiple authors/contributors should be preceded by a statement in which the student clearly identifies the contribution of each author to the manuscript
- reference formatting will be consistent throughout the thesis, will include the title of the citation and references will be placed at the end of each manuscript/chapter
-

Layout for Manuscript form of thesis:

Title page

Abstract (not more than 350 words)

Statement of Co-Authorship (if necessary)

Acknowledgments

Table of Contents (including bibliography, appendices, etc.)

List of Tables

List of Figures and Illustrations

List of Abbreviations

Chapt. 1: General Introduction – brief summary of the research problem (not more than 3 pages)

Chapt. 2: Literature Review (**normally** no more than 25 pages for MSc and 40 pages for PhD)

Chapt. 3 to n: Manuscripts

Chapt. n + 1: Summary of thesis work (including Future Directions)

Appendices

The formal section, "Statement of Co-Authorship", should delineate the candidate's contribution to knowledge, and should allow the contribution of co-authors (if any) to be discerned. This information shall be included in more detail at the beginning of each chapter relating to a coauthored manuscript.

Thesis Submission and Defence

**Please note that there is a “Completing Your Degree” webpage on the SGS website that you should read though:
<http://www.queensu.ca/sgs/current-students/degree-completion>

The Faculty of Health Sciences manual further explains the defense process and requirements:

<http://www.queensu.ca/sgs/sites/webpublish.queensu.ca.sgswww/files/files/Faculty%20-%20Councils/FHSGC/Health%20Sciences%20Graduate%20Council%20Manual%20November%202016.pdf>

Procedures for Thesis Submission (MSc)

The scheduling and administrative procedures described in this section are very important to ensure the smooth planning and execution of the thesis examination process. Please keep in mind that other commitments and/or vacations of faculty and/or staff involved, may prevent completion of your documentation if arrangements are left to the last minute!

For an **MSc** thesis defence, the following should be completed approximately 6 weeks prior to the defence date:

The supervisor shall provide the Graduate Program Assistant with several potential names for members of the Examination Committee. These will be submitted to the Departmental Graduate Program Committee for approval. The Graduate Program Assistant will advise the supervisor of the Graduate Program Committee’s decision. The supervisor will then contact the potential examiners and obtain commitments from the nominated members to serve as examiners and to attend the oral thesis examination as scheduled. You and your supervisor will need to submit to the Graduate Program Assistant:

- Thesis title
- List of nominees for the Examining Committee
- Timeframe

A final copy of your thesis must be approved by your supervisor before you makes copies for the examiners (including the Chair). It is your responsibility to ensure that the thesis follows the format required by the Department and the School of Graduate Studies.

The Oral Thesis Examination Form (online) may be completed by either you or the Graduate Program Assistant, and then signed by your Supervisor and the Department Head (the Graduate Program Director may sign in place of the Head).

Printing/copying costs can be reduced by printing examiners’ copies in black and white, and providing a PDF copy to enable them to see the photographs / figures in colour. The Department will cover up to \$200 for thesis printing and related costs (please keep all your receipts and submit them to the Graduate Program Assistant).

TEN (10) WORKING DAYS prior to the defence date, a signed Oral Thesis Examination Form, must be submitted to the School of Graduate Studies you must submit a hardcopy of your thesis to each member of your Examining Committee (it is suggested that you also provide them with an electronic copy).

It is your responsibility to arrange the booking of audio/visual equipment and ensure you have a working knowledge of it.

An Evaluation Form from the School of Graduate Studies needs to be completed and forwarded to the Graduate Program Assistant (at least 3 days prior to examination date) by any member of the Examination Committee who feels that the defence should **NOT** go ahead. It is understood that if said form is not submitted, the Examiner feels the defence should go ahead.

At the beginning of the oral examination, you will leave the room briefly while the Committee decides whether the defence should go forward. This is followed by a 20-25 minute presentation by you, followed by the examiners' questions. You must then leave the room again while the committee discusses its evaluation.

The Chairperson (1) discusses the outcome of the examination with you and your supervisor immediately following the defence, and (2) reports the outcome in writing to the School of Graduate Studies.

The Registrar of the School of Graduate Studies will notify you (copy to Department) of the completion of your degree requirements only after submission of four unbound copies of your thesis, which have been revised (if required) as recommended by the Thesis Examining Committee, and finally approved by the supervisor/committee. Tuition fees are charged up to the date of receipt of the thesis copies.

Procedures for Thesis Submission (PhD)

The scheduling and administrative procedures described in this section are very important to ensure the smooth planning and execution of the thesis examination process. Please keep in mind that other commitments and/or vacations of faculty and/or staff involved, may prevent completion of your documentation if arrangements are left to the last minute!

For a **PhD** thesis defence, the following should be completed approximately 6 weeks prior to the defence date:

The supervisor shall provide the Graduate Program Assistant with several potential names for members of the Examination Committee. These will be submitted to the Departmental Graduate Program Committee for approval. The Graduate Program Assistant will advise the supervisor of the Graduate Program Committee's decision. The supervisor will then contact the potential examiners and obtain commitments from the nominated members to serve as examiners and to attend the oral thesis examination as scheduled. You and your supervisor will need to submit to the Graduate Program Assistant:

- Thesis title
- List of nominees for the Examining Committee
- Timeframe

A final copy of your thesis must be approved by your supervisor before you makes copies for the examiners (including the Chair). It is your responsibility to ensure that the thesis follows the format required by the Department and the School of Graduate Studies.

The Oral Thesis Examination Form (online) may be completed by either you or the Graduate Program Assistant, and then signed by your Supervisor and the Department Head (the Graduate Program Director may sign in place of the Head).

Printing/copying costs can be reduced by printing examiners' copies in black and white, and providing a PDF copy to enable them to see the photographs / figures in colour. The Department will cover up to \$200 for thesis printing and related costs (please keep all your receipts and submit them to the Graduate Program Assistant).

TWENTY-FIVE (25) WORKING DAYS prior to the defence date, a signed Oral Thesis Examination Form, must be submitted to the School of Graduate Studies along with a hardcopy of your thesis. You must also, within 25 working days prior to your defence, submit a hardcopy of your thesis to each member of your Examining Committee (it is suggested that you also provide them with an electronic copy).

It is your responsibility to arrange the booking of audio/visual equipment and ensure you have a working knowledge of it.

An Evaluation Form from the School of Graduate Studies needs to be completed and forwarded to the Graduate Program Assistant (at least 3 days prior to examination date) by any member of the Examination Committee who feels that the defence should NOT go ahead. It is understood that if said form is not submitted, the Examiner feels the defence should go ahead.

At the beginning of the oral examination, you will leave the room briefly while the Committee decides whether the defence should go forward. This is followed by a 20-25 minute presentation by you, followed by the examiners' questions. You must then leave the room again while the committee discusses its evaluation.

The Chairperson (1) discusses the outcome of the examination with you and your supervisor immediately following the defence, and (2) reports the outcome in writing to the School of Graduate Studies.

The Registrar of the School of Graduate Studies will notify you (copy to Department) of the completion of your degree requirements only after submission of four unbound copies of your thesis, which have been revised (if required) as recommended by the Thesis Examining Committee, and finally approved by the supervisor/committee. Tuition fees are charged up to the date of receipt of the thesis copies.

STUDENT GRIEVANCE AND MEDIATION PROCESS

A student who is dissatisfied with his/her progress, or feels that the commitments of the supervisor are not being fulfilled, should call a meeting of the supervisory committee to discuss the problem.

In cases of problems associated with supervision or conflicts between graduate students, supervisors and/or advisory committee members, the procedures for mediation outlined below should be followed.

- It is advised that resolution of the issue be sought first through informal Departmental and School of Graduate Studies channels. Thus, discussion of the problem should occur first between you and your supervisor and/or supervisory committee.
- If the issue cannot be resolved at this level, one or both parties should consult the Graduate Program Director to seek possible resolution. The Graduate Program Director will consult with the Head of the Department if the issue needs to be dealt with by the School of Graduate Studies.
- If a satisfactory resolution is not reached, assistance can be requested of the Dean or Associate Dean(s) of the School of Graduate Studies. In consultation with the person(s) seeking advice, the Dean may elect to appoint an advisory committee to help resolve the issue. All consultations in the Departmental and School of Graduate Studies channel are kept confidential and no direct action will be taken without the prior consent of the person(s) seeking advice.
- Resolution of the issue can also be sought through the University's Grievance Procedures, which include informal, administrative and formal channels. The Queen's Senate Statement on Grievance, Discipline and Related Matters and the University's Grievance and Appeal Procedures document should be consulted.

WITHDRAWAL FROM THE PROGRAM

For students who withdraw for reasons other than unsatisfactory reports or failure of an examination, a letter and academic change form from the student and a letter from the supervisor detailing the reasons for withdrawal must be sent to the Graduate Program Director. A student who requests a temporary absence (inactive status) due to medical reasons may make an application to the School of Graduate Studies for a fee waiver, stipends will not be distributed during a temporary absence. Each case is assessed on its own merit.

COLLABORATIVE RESEARCH GUIDELINES

Preamble

Queen's University has explicit guidelines concerning intellectual property and the publication of research results. The purpose of this section is therefore to draw your attention to issues which may need to be considered with respect to data "ownership" and authorship. It is stressed that this section is by no means comprehensive in its treatment of possible situations in which researchers may find themselves. Many situations may need to be dealt with on a case by case basis. Readers are referred to the aforementioned documents as well as the Code of Research Ethics, all of which were published as Supplements to the Queen's Gazette, and which deal with these issues more comprehensively.

Overview

Publication of results is a basic and integral part of research. Thus, you are expected to publish results from your thesis research in the scientific literature. Since thesis research is almost always supported through the supervisor's research grant, and is normally a collaborative effort involving you and your supervisor, some form of joint authorship is always (except in the most unusual circumstances) appropriate on all papers resulting from the thesis research. Incoming graduate students are encouraged to discuss such joint authorship arrangements with their supervisor at the outset of their graduate program.

Guidelines

These guidelines reflect the general procedures followed by many professors and are listed below to form the basis for discussion between you and your supervisor.

- Your supervisor has a right to the originals of both the raw data and any analyses on which your thesis is based. You may have a copy of these.
- You will usually be first author on all publications arising directly from your thesis research exceptions to this may occur when the majority of ideas, data analyses or writing are provided by your supervisor or other researchers; or, a significant amount of additional research or analysis is required to produce publishable results. In cases of multiple authorship, your supervisor will make the final decision regarding order of authorship.
- Your supervisor is always co-author on all publications arising from your thesis research except in most unusual circumstances.
- Students employed as research assistants for data collection or analysis should not expect joint authorship unless they have made significant original contributions to the research program.
- Supervisors have the right to write up and take first authorship on papers based on any material in your thesis or arising from your thesis and not submitted for publication within one year of your thesis defence (or sooner, if necessary; e.g. material needs to be submitted for publication before a grant application deadline). Since you will be co-author on such papers, thesis material may be used directly without infringing on your copyright.

Supervisors are advised to discuss with you at the outset issues related to intellectual property. It should be recognized that, in accordance with Queen's University policy, intellectual property is owned by the creators. However, the University retains a royalty-free irrevocable right to use for educational and research purposes any intellectual property created by a student in relation to her/his research activities.
